

Level 0

Challenge A

Directions:

In the `prolog_challenges.pl` file, create a predicate called `"sanitycheck"` that does the following:

The predicate will unify its argument to 42. That's it. Just unified to 42. Single parameter, unified to the number 42.

Examples:

```
/* query */    ?- sanitycheck(X).  
/* result */   X = 42.
```
