

Level 1

Challenge C

Directions:

In the `prolog_challenges.pl` file, create a predicate called `"range"` that does the following:

The predicate will take a min and max integer and unify a list of all consecutive numbers in that range (inclusively).

Examples:

```
/* query */    ?- range(1, 9, List).  
/* result */   List = [1, 2, 3, 4, 5, 6, 7, 8, 9] .  
  
/* query */    ?- range(1, 5, List).  
/* result */   List = [1, 2, 3, 4, 5] .  
  
/* query */    ?- range(5, 10, List).  
/* result */   List = [5, 6, 7, 8, 9, 10] .  
  
/* query */    ?- range(5, 5, List).  
/* result */   List = [5] .  
  
/* query */    ?- range(6, 5, List).  
/* result */   List = [] .
```
